

Traffic Signal Installation

Span wire signals will be installed at the intersection of Memorial Highway and 3rd St SE/Bisman Ave. This 4-way traffic signal will control the movement of traffic through the intersection.

The span wire traffic signals will be installed in fall 2021. The image above shows a span wire traffic signal that currently exists at the intersection of Memorial Highway and 40th Ave. In 2023/2024, all traffic signals on Memorial

Highway are planned to be replaced. Below is a rendering of the proposed design for these traffic signals (Memorial Highway & 3rd St SE shown).

What Will We See Next?

Phase 1 construction is tentatively planned for 2022. Phase 1 improvements to Memorial Highway taking place include **storm sewer installation** and the **relocation of 3rd St SE/Memorial Highway lift station** (pictured below) to the west side of 3rd St SE. Disruption to traffic in 2022 is expected to be minimal.

The North Dakota Department of Transportation has created a website for the project. Visit dot.nd.gov/projects/memorialhwy for more information. To submit comments, email input@memorialhighwayproject.com. Periodic updates will also be posted to the cityofmandan.com website.
